

New application Tropimed®

We have the pleasure to announce that **the new Tropimed is now available online.**

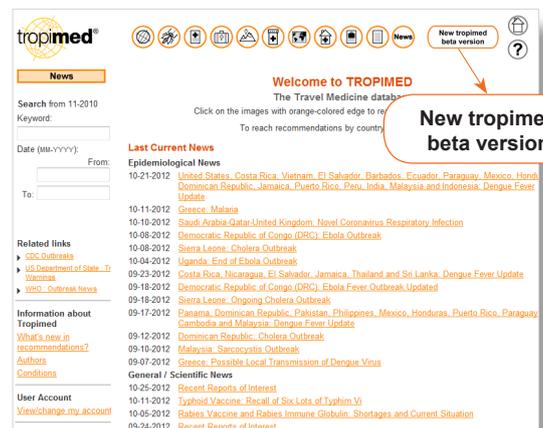

To access the new version click on the icon «**New Tropimed beta version**» at the top right of the current Tropimed screen. You can also login to the new version directly by entering the address <https://www.tropimed.com/tropimed>.

The new version is the result of a major development effort but it might still have some «teething troubles»: Please report any remaining bugs using the «report a bug» form.

We hope that you will appreciate the new interface and its different innovative functions (improved vaccination plan, user management, new maps with zoom function...).

Tropimed has been providing vaccination and healthcare advice for travel medicine professionals for 20 years.
